This chart is a guide. Not every body type can be safely harnessed for skydiving, but if you weigh less than the maximum weight for your height in this chart, we should be able to harness you safely to skydive. ***If in doubt or if your weight exceeds the max. weight for your height, contact us to get a personal assessment.***

Our absolute maximum weight is 300.00 lbs, on our scale, in the clothes you will wear during your skydive.
